How to use your New Axent Mechanism

New Axent Mechanism

Simplistic controls make this mechanism really easy to use and ultra ergonomic. This quick and easy mechanism has been developed to put the user in full control of their chair, enabling them to work in free flow mode or lock the chair into a position that is comfortable for them.

1) Adjustable Lumbar Panel

From a seated position, raise or lower the Lumbar Panel to optimise comfort and support for your lower back.

2) Back Angle Adjustment

Pull the lever out to adjust back angle to the desired angle, release to lock desired position.

3) Seat Height Adjustment

Raise the lever upwards to adjust the height of the seat and maximise comfort. Release lever when your seat is in your preferred position.

4) Seat Slide

Lift the paddle up to alter the seat depth by sliding your body forward. When you are happy with the seat location release the paddle to lock the chair into the desired position.
